

CORROSION CLASSES		
	Typical Exterior Environments	Typical Interior Environments
C1	-	Heated buildings with clean atmospheres eg. Offices, schools, shops, hotels
C2	Atmospheres with low level of pollution. Mostly rural areas.	Unheated buildings where condensation may occur eg depots, warehouses, sports halls
C3	Urban and industrial atmospheres, moderate sulfur dioxide pollution. Coastal areas with low salinity.	Production rooms with high humidity and some air pollution (food processing plants, laundries, breweries, dairies)
C4	Industrial areas and coastal areas with moderate salinity.	Chemical plants, swimming pools, coastal shipyards.
C5-I	Industrial areas with high humidity and aggressive atmosphere.	Buildings or areas with almost permanent condensation and high pollution
C5-M	Coastal and offshore areas with high salinity.	Buildings or areas with almost permanent condensation and high pollution
